TECHNICAL COLLEGE SYSTEM OF GEORGIA

Hazard Communication Program Plan

Ogeechee Technical College

2019-2020

INTRODUCTION

The State Board of the Technical College System of Georgia (SBTCSG), along with its technical colleges and work units, is committed to providing a safe and healthful environment for its employees, students, volunteers, visitors, vendors and contractors. SBTCSG Policy II.D. Emergency Preparedness, Health, Safety and Security compels technical colleges and work units to ensure that information about the dangers of all hazardous materials used are known by all affected individuals. This Hazard Communication Program Plan (HCPP) is established to prevent the potentially injurious exposure to hazardous materials through the improper use, handling, transportation, containment, storage, or disposal of such materials under normal operating conditions or potentially during an emergency situation. This HCPP provides guidance for training regarding the contents of the Occupational Safety and Health Administration (OSHA) Hazard Communications Standard, 29 CFR 1910.1200 (along with the Georgia Public Employee Hazardous Chemical Protection and Right to Know Act of 1988 O.C.G.A. §45-

22-1 to §45-22-12 as well as the Georgia Public Employee Hazardous Chemicals Protection and Right to Know Rules, 300-3-19-01 et seq. To this end, the HCPP is maintained, reviewed, exercised and updated at least annually to ensure compliance and protection for employees and students.

This Hazard Communication Program Plan includes the following topics:

- program administration
- exposure determination
- implementation of methods of exposure control
 - standard hazardous materials precautions
 - engineering and administrative controls
 - personal protective equipment (PPE)
 - housekeeping
 - laundry
- container labeling
- safety data sheets
- training and information
- hazardous non-routine tasks
- informing other employers/contractors
- hazardous material inventories
- evaluation and follow-up post-exposure to hazardous materials
- evaluation of circumstances surrounding exposure incidents
- chemicals in unlabeled pipes and
- program availability

I. PROGRAM ADMINISTRATION

- A.** The Hazard Communication Program (HCP)/Right to Know (RTK) Coordinator, has the overall responsibility for the Hazard Communication Program. The HCP/RTK Coordinator will review and update and then subsequently submit the HCPP to the TCSG System Office annually, or more frequently if necessary to reflect any new or modified tasks or activities; new or revised employee classifications or new academic programs with potential injurious exposure to hazardous materials to ensure compliance and protection for all individuals.

Contact Information for HCP/RTK Coordinator

Stan York, Director for Campus Safety and Security
1 Joseph E.
Kennedy Blvd.
Statesboro, Georgia
30458
912.681.5667 or 912.531.7264

- B.** Those individuals who are determined to be at risk of exposure to hazardous materials must comply with the procedures and practices outlined in this HCPP.
- C.** The assigned designees listed below are responsible for the implementation, documentation, review, training, and record keeping with respect to the areas of implementation of methods of exposure control, container labeling, safety data sheets, training and information.

<u>Program or Work Area</u>	<u>Contact Name</u>	<u>Contact Information</u>
-----------------------------	---------------------	----------------------------

See Appendix A.

- D.** Ogeechee Technical College engages in the following contractual agreements regarding hazardous materials communication with:

Sunbelt Medical Services
637 Charles Perry
Av. Sardis, Georgia
30456
912-569-4641

- E.** Ogeechee Technical College engages in the training, drills and exercises through-out the year during annual staff development days, campus and /or classroom drills and exercises regarding hazard materials communication. The protocol for the retention of training records is for the documentation of

annual training to be placed in each covered employees personnel file with an additional copy in the College's master training file.

- F. The protocol for the annual review of the Ogeechee Technical College HCPP is for the HCP Coordinator will review the HCP Plan in April of each year. Once approved by TCSG, the BCP is then reviewed by the College's executive team (Executive Council) and Local Board of Directors. The Vice President for Institutional Effectiveness oversees this process. The protocol for the retention of the HCPP is for the plan and all of its revisions to be retained for a three year period.

II. EXPOSURE DETERMINATION

Individuals are identified as having a risk of exposure to hazardous materials based on the tasks or activities in which they engage. "Covered" individuals are identified by the work unit or technical college as those employees or students who are at risk or vulnerable in the normal conduct of their tasks or activities for potentially injurious exposure to hazardous materials. A "covered" occupational task or activity is recognized as one in which risk of exposure is reasonably expected. These individuals include part-time, temporary, contract, and per-diem employees.

The following is a list of job and/or student program classifications that present the opportunity for potentially injurious exposure to hazardous materials.

<u>Job/Program Title</u>	<u>Occupational/Program Area</u>
--------------------------	----------------------------------

See Appendix B.

III. IMPLEMENTATION OF METHODS TO REDUCE EXPOSURE RISK

The individuals identified in I. C. are responsible for implementing and documenting the following methods to reduce exposure risk:

- A. **Standard Precautions:** All covered individuals will use hazardous materials standard precautions as dictated by the task or activity. These standard precautions include adhering to appropriate prescribed engineering and administrative controls, personal protective equipment, housekeeping, and laundry.
- B. **Personal Protective Equipment:**
 1. Appropriate personal protective equipment (PPE), including but not limited to: respiratory, gloves, protective clothing, eye, and face protection, is provided to covered employees at no cost and available to covered students at the student's expense.
 2. Training/record keeping in the use of PPE for specific tasks is provided and maintained.

3. Adequate supplies of the aforementioned equipment will be available in the appropriate size/fit.
4. All covered employees and covered students using PPE must observe the following precautions:
 - a. Wear appropriate PPE when it is reasonably anticipated that there may be contact with hazardous materials; replace gloves or other protective clothing if torn or punctured, or if their ability to function as a barrier is compromised.
 - b. Utility gloves or other protective clothing may be reused if their integrity is not compromised. Utility gloves or other protective clothing should be discarded if they show signs of cracking, peeling, tearing, puncturing, or deterioration.
 - c. Appropriate face and eye protection should be donned when splashes, sprays, spatters, or droplets of hazardous material pose as risk to the eye, nose, or mouth.
 - d. Respiratory protection devices should be donned when the vapors of fumes pose a risk to the respiratory system.
 - e. Disposable PPE should be discarded properly after each use.

IV. CONTAINER LABELING

- A. The HCP/RTK Coordinator will review labeling procedures periodically and will update labels as required.

The Director for Campus Safety and Security/HCCP Coordinator and/or the College Campus Safety Officer will check with the Shipping/Receiving Technician quarterly to verify that all containers received for use will be clearly labeled as to the contents, note the appropriate hazard warning, and list the manufacturer's name and address.

The Program Director in each section will ensure that all secondary containers are labeled with either an extra copy of the original manufacturer's label or with labels marked with the identity and the appropriate hazard warning. For help with labeling, see Director for Campus Safety and Security.

- B. The individuals identified in I. C. are responsible for implementing and documenting the following container labeling requirements for their respective organizational areas:
 1. Verify all containers received for use are clearly labeled as to contents, appropriate hazard warning (both physical and health), and manufacturer's name and address.
 2. Defaced or missing labels are replaced quickly with an appropriate secondary label.
 3. All secondary containers are labeled with either an extra copy of the original manufacturer's label or with labels marked with the identity and the appropriate hazard warning(s). For assistance with labeling, contact

the Director for Campus Safety and Security.

4. Additional secondary labeling methods used by the technical college/work unit are described here: any combination of OSHA pictograms, words, numbers, and colors may be used as secondary labeling to identify materials in a container.
5. For the following individual stationary process containers (such as storage tanks), a labeling system rather than a label is used to convey the required information: OSHA Pictograms

Labels: Pictograms

There are 9 pictograms:

- Health Hazards
- Physical Hazards
- Environmental Hazards

<p><u>Flame over circle</u></p>  <ul style="list-style-type: none"> • Oxidizers 	<p><u>Flame</u></p>  <ul style="list-style-type: none"> • Flammables • Pyrophorics • Self-Heating • Emits Flammable Gas • Self Reactives • Organic Peroxides 	<p><u>Exploding bomb</u></p>  <ul style="list-style-type: none"> • Explosives • Self Reactives • Organic Peroxides
<p><u>Skull and crossbones</u></p>  <ul style="list-style-type: none"> • Acute toxicity (severe) 	<p><u>Corrosion</u></p>  <ul style="list-style-type: none"> • Corrosives 	<p><u>Gas cylinder</u></p>  <ul style="list-style-type: none"> • Gases under pressure
<p><u>Health Hazard</u></p>  <ul style="list-style-type: none"> • Carcinogen • Mutagenicity • Reproductive Toxicity • Respiratory Sensitizer • Target Organ Toxicity • Aspiration Toxicity 	<p><u>Environment</u></p>  <ul style="list-style-type: none"> • Aquatic Toxicity 	<p><u>Exclamation mark</u></p>  <ul style="list-style-type: none"> • Irritant • Skin Sensitizer • Acute Toxicity (harmful) • Narcotic effects • Respiratory Tract Irritation • Hazardous to Ozone Layer

6. Identify any in-house labeling system in use.
In-house labeling system that relies on Label's Hazard Warnings
May Use Words, Pictures, Colors, or Numbers
 - A. Words may list specific hazards (e.g., flammable, corrosive).
 - B. Words may signal level of risk:

1. DANGER: can cause immediate serious injury or death
 2. WARNING: can cause serious injury or death
 3. CAUTION: can cause moderate injury
- C. Pictures may illustrate hazards (flame for fire, skull and crossbones for poison).
- D. Colors may be used instead of words or pictures:
1. RED = Fire hazard
 2. YELLOW = Reactivity hazard
 3. BLUE = Health hazard
 4. WHITE = Specific hazard such as acid or corrosive, or the personal protective equipment you need to protect against this hazard
- E. Numbers (which are often combined with colors) tell how serious the hazard is:
1. 0 = Minimal hazard
 2. 1 = Slight hazard
 3. 2 = Moderate hazard
 4. 3 = Serious hazard
 5. 4 = Severe hazard

V. SAFETY DATA SHEETS

- A.** The HCP/RTK Coordinator is responsible for establishing and monitoring the technical college or work unit SDS program.
- B.** The individuals identified in I. C. are responsible for implementing and documenting the following SDS requirements for their respective organizational areas.
1. Procedures are developed to obtain the necessary SDSs and for the review of incoming SDSs for new or significant health and safety information. Any new information is communicated to affected employees. An alternate procedure will be followed when an SDS is not received at the time of initial shipment:
The Shipping/Receiving Technician will notify the material/chemical company to submit a SDS on the material. After the Safety Data Sheets are received, the Shipping/Receiving Technician will forward the sheets as soon as possible to the appropriate personnel.
 2. Copies of SDSs for all hazardous materials to which covered individuals are exposed or are potentially exposed will be kept in readily accessible locations.
Copies of SDSs are maintained in the Ogeechee Technical College's Safety and Security Office, and this information is also available online by connecting to the following online link:
<http://hq.msdsonline.com/ogeecheetech>
MSDSonline is a provider of a cloud-based solutions company that manage global hazard communication regulatory compliance requirements. On their webpage, you may search for the material/chemical by name in MSDSonline Search or eBinder. The information for the material/chemical will be displayed for review.

If an SDS is not available, contact Director for Campus Safety and Security/HCCP Coordinator.

3. SDSs will be readily available to covered individuals in each work area using the following format: The Safety Data Sheet(s) are kept in the classroom and/or laboratory where the covered individuals are attending class. Covered individuals may read the SDSs, located in a yellow three-ring binder, located by the rooms' entry doorway; or go to the Ogeechee Technical College's Safety and Security webpage, and select the online link: <http://hq.msdsolnline.com/ogeecheetech>.
4. When revised SDSs are received, the following procedures will be followed to replace old SDSs: Upon receiving an SDS, the HCCP Coordinator will check the online website <http://hq.msdsolnline.com/ogeecheetech> for any material/chemical SDS *current updates*. Material/Chemical Manufacture should submit updates to msdsolnline.com as new updates are made available. MSDSolnline will notify the HCCP Coordinator as the updates are received.

VI. TRAINING AND INFORMATION

A. The HCP/RTK Coordinator is responsible for the HCCP training and will ensure that all program elements are carried out. The HCP/RTK Coordinator is responsible for maintaining the Master Training Log.

B. The individuals identified in I. C. are responsible for implementing and documenting the following training requirements for their respective organizational areas.

1. All covered individuals will receive an explanation of this HCCP during their initial training or academic experience, as well as a review on an annual basis.
2. Everyone who works with or is potentially exposed to hazardous materials will receive initial training on the hazard communication standard and this HCCP before starting work and refresher training annually. Each new covered individual will attend training that includes the following content:
 - an overview of the OSHA Hazard Communication Standard
 - the hazardous materials present
 - the physical and health risks of the hazardous materials
 - symptoms of overexposure
 - how to determine the presence or release of hazardous materials
 - how to reduce or prevent exposure to hazardous materials through use of control procedures, administrative practices and personal protective equipment
 - steps taken to reduce or prevent exposure to hazardous materials
 - procedures to follow if covered individuals are overexposed

- to hazardous materials
- how to read labels and SDSs to obtain hazard information
- location(s) of the SDSs and written Hazard Communication Program Plan

3. Prior to introducing a new hazard into any organizational unit, each employee in that organizational unit will be given information and training as outlined above for the new hazard. The training format will be as follows:

The immediate supervisor and/or department director of the employee will review with the employee(s) any new material/chemical hazards information the employee(s) may be exposed to during the performance of their assigned duties by the best means available to them (Such as audiovisuals, interactive computer programs, classroom instructions, etc.).

The classroom instructor will review with the covered students any new material/chemical hazards information by best means available to the instructor. (Such as audiovisuals, interactive computer programs, classroom instructions, etc.).

The HCCP Coordinator will meet with new employees and cover where to locate the information on hazardous materials used on this campus as part of their “New Employee Orientation” and “Right to Know Act”.

VII. HAZARDOUS NON-ROUTINE TASKS

Periodically, covered individuals are required to perform non-routine tasks that are hazardous. Examples of non-routine tasks are: confined space entry, tank cleaning, and painting reactor vessels. Prior to starting such tasks, each affected covered individual will be given information by the individuals identified in I. C. for their respective organizational area about the hazardous materials which may be encountered. This information includes specific chemical hazards, protective/safety measures, and steps being taken to reduce hazards, including ventilation, respirators, the presence of another employee (buddy systems), and emergency procedures.

Examples of non-routine tasks performed by covered individuals of the company:

<u>Task</u>	<u>Hazardous Material</u>
Stripping Tile Floor	Ammonia Solution
Deglazing Auto Engine Block	Mineral Spirits
Making Diluted Chemical Solutions	Concentrated Acids

VIII. INFORMING OTHER EMPLOYERS/CONTRACTORS

A. The HCP/RTK Coordinator is responsible for providing other employers and

contractors with information about hazardous materials that their employees may be exposed to on a given work unit/technical college site as well as suggested precautions for those employees. The HCP/RTK Coordinator is also responsible for obtaining information about hazardous materials used by other employers to which employees of the work unit or technical college may be exposed.

B. Other employers and contractors will be provided with SDSs for hazardous materials generated by the operations of the work unit or technical college in the following manner:

Contractors (300-3-19.04)

- It is the responsibility of independent contractors working on State property to ensure its contract employees are provided information and trained on hazardous chemicals.
- Workplace Managers shall be notified at least (30) thirty days prior to any hazardous chemical work at a State site by an independent contractor.
- The following notice will be used by an Independent Contractor/Subcontractor when work involving hazardous materials/chemicals will be used or stored in the workplace on the OTC campus.

INDEPENDENT CONTRACTOR/SUBCONTRACTOR USE OF HAZARDOUS CHEMICALS NOTIFICATION

I, _____ (Name/Title) of _____ (Company & Address), hereby notify Ogeechee Technical College, this _ day of ___ 2 ____, (a minimum of 30 days prior to the commencement) of work involving hazardous chemicals which will be used or stored in the workplace of Ogeechee Technical College by my organization. This notification is in fulfillment of 45-22-7 of Georgia Laws Regulating Hazardous Chemicals and the request of:

Ogeechee Technical College Hazardous Chemicals Communications Coordinator
and/or

Employee Name

Employee Title

C. In addition to providing a copy of an SDS to other employers, other employers will be informed of necessary precautionary measures to protect employees exposed to operations performed by the work unit or technical college.

D. Other employers will be informed of the hazard labels used by the work unit or technical college. If symbolic or numerical labeling systems are used, the other employees will be provided with information to understand the labels used for hazardous materials for which their employees may have exposure.

IX. HAZARDOUS MATERIAL INVENTORIES

A. A biennial inventory of all known hazardous materials used by covered individuals is associated with this HCPP. This inventory includes the name of the chemical, the manufacturer, the work/study area in which the material is used, and quantity if it exceeds the Threshold Planning Quantity (TPQ). The inventory should be arranged to be able to cross-reference it with the SDS file and the labels on containers. Additional useful information, such as the manufacturer's telephone number, and emergency number, scientific name, CAS number, the associated task, tec., can be included. See these links for further information on TPQ:

<http://www.gpo.gov/fdsys/pkg/CFR-2013-title40-vol29/pdf/CFR-2013-title40-vol29-part355-appB.pdf>

<http://www.gpo.gov/fdsys/pkg/CFR-2013-title40-vol29/pdf/CFR-2013-title40-vol29-part355-appA.pdf>

B. When new materials are received, the inventory is updated (including date the materials were introduced) within 30 business days. To ensure any new material is added in a timely manner, the following procedures shall be followed:

When new materials are received, the Shipping/Receiving Technician or the individual receiving the new materials will notify the Director for Campus Safety and Security/HCCP Coordinator of the shipment of materials. The Director for Campus Safety and Security/HCCP Coordinator will add any new material to the list of SDSs on the msdsonline webpage at: <http://hq.msdsonline.com/oqeecheetech>; add any new materials to the list of SDSs in the Safety and Security Office; and a copy of the SDS to the classroom or laboratory yellow three-ring binder where the material/chemical will be used.

C. The Hazardous Material Inventory is compiled and maintained and submitted to the TCSG System Office by the Director for Campus Safety and Security/ HCCP Coordinator at 912-681-5667.

X. EVALUATION AND FOLLOW UP POST-EXPOSURE TO HAZARDOUS MATERIALS

A. Should an exposure incident occur, contact the Director for Campus Safety and Security/HCCP Coordinator at the following telephone number 912-681-5667.

B. An immediate available confidential medical evaluation and follow-up will be conducted and documented by a licensed health care professional.

1. Following initial first aid the following activities will be performed:
2. Document the routes of exposure and how the exposure occurred.

C. During the period of the 2017-2018 ECP the following incidents surrounding exposure occurred. *No incidents reported last year.*

XI. EVALUATION OF CIRCUMSTANCES SURROUNDING EXPOSURE INCIDENTS

A. The Safety Committees' Safety Officer and/or The HCCP Coordinator will review the circumstances of all exposure incidents to determine:

1. engineering controls in use at the time
2. administrative practices followed
3. a description of the material being used (including type and brand)
4. protective equipment or clothing that was used at the time of the exposure incident (gloves, eye shields, etc.)
5. location of the incident
6. task being performed when the incident occurred
7. training records of covered employee or student

B. If revisions to this HCCP are necessary the Director for Campus Safety and Security/HCCP Coordinator will ensure that appropriate changes are made.

C. The following protocol is followed for evaluating the circumstances surrounding an exposure incident. An exposure incident will be reviewed by the HCCP Coordinator and the Safety Committee members. A writing review summary will be submitted to Ogeechee Technical College's Executive Council.

XII. CHEMICALS IN UNLABELED PIPES

Prior to starting work in areas where chemicals are transferred through unlabeled pipes, covered individuals should contact the individuals identified in I. C. for their respective organizational area for information regarding the identity of the material in the pipes; potential hazards; and required safety precautions.

XIII. PROGRAM AVAILABILITY

A. All covered individuals can review this HCCP at any time while performing these tasks or activities by contacting the Director for Campus Safety and Security/HCCP Coordinator. If requested, a hard copy of this HCCP will be provided free of charge within 15 business days of request. Copies of the Hazard Communication Program Plan are available in the Office of Campus Safety, JEK Building, 1 Joseph E. Kennedy Blvd., Statesboro, Georgia 30458.

XIV. CAMPUS SAFETY COMMITTEE

The OTC Campus Safety Committee (CSC) is comprised of Executive Council

members, faculty, staff, and student body personnel. The CSC meets three or four times a year. See XI–C above.

XV. CAMPUS SAFETY ADVISORY BOARD

The OTC Campus Safety Advisory Board is comprised of public safety community leaders from the following areas:

- Director for Bulloch County Emergency Management Services

- Sheriff for Bulloch County

- Fire Chief for Bulloch County Fire Department

Appendix A

Program or Work Area	Contact Name	Contact Information
		Area Code (912)
Director for Campus Safety & Security	Stan York	681-5667
Safety Committee Safety Officer	Allen McDaniel	688-6917

Air Conditioning Technology Instructor	S. Shane Todd	stodd@ogeecheetech.edu	871-1716
Automotive Technology Instructor	Allen McDaniel	lmcdaniel@ogeecheetech.edu	688-6917
Business Administrative Technology Instructor	Michael Twisdale	mtwisdale@ogeecheetech.edu	871-1626
Business Management Instructor	Alex Harris	aharris@ogeecheetech.edu	871-1622
Commercial Construction Management Instructor	Jeffry Roberson	jroberson@ogeecheetech.edu	871-1692
Commercial Truck Driving Program Director/Instructor	Jim Riner	jriner@ogeecheetech.edu	739-2671
Computer Information Systems Instructor	Donny Collins	docollins@ogeecheetech.edu	871-1618
Cosmetology Instructor	Jeff Shaver	jshaver@ogeecheetech.edu	688-6957
Criminal Justice Instructor	Terry Briley	tbriley@ogeecheetech.edu	871-1690
Culinary Arts Instructor	Bryan Richard	brichard@ogeecheetech.edu	688-6029
Dental Assisting Program Director/Instructor	Yvonne Jenkins	yjenkins@ogeecheetech.edu	486-7700
Director for Library Services	Lisa Lanier	llanier@ogeecheetech.edu	871-1606
Early Childhood Care and Education Instructor	Paula Clifton	pclifton@ogeecheetech.edu	688-6003
Echocardiography Instructor	Capre Mitchell	cmitchell@ogeecheetech.edu	688-6950
Electrical Systems Technology Instructor	Norm Threatt	nthreatt@ogeecheetech.edu	871-1619
Fish & Wildlife Management Instructor	Casey Corbett	ccorbett@ogeecheetech.edu	688-6036
Funeral Services Instructor	Michelle Rugar	mrugar@ogeecheetech.edu	871-1960
Health Information Technology Instructor	Priscilla Waters	pgarrison@ogeecheetech.edu	486-7401
Logistics Instructor	Jillian Johnson	jjohnson@ogeecheetech.edu	871-8541
Medical Assisting Program Director/Instructor	Michelle McCranie	mmcraie@ogeecheetech.edu	486-7616

Nurse Aide Instructor	Felicia Barefoot	fbarefoot@ogeecheetech.edu	688-6967
Opticianry Program Director/Instructor	Deborah DeLoach	ddeloach@ogeecheetech.edu	486-7404
Paramedicine Program Director/Instructor	Chris Page	cpage@ogeecheetech.edu	871-8551
Pharmacy Technology Program Director/Instructor	Rushunda Bell	rbell@ogeecheetech.edu	486-7620
Practical Nursing Program Director/Instructor	Sharlene Conley	sconley@ogeecheetech.edu	486-7653
Radiologic Technology Program Director/Instructor	Jan Martin	martin@ogeecheetech.edu	871-1647
Sonography Program Director/Instructor	Tina Welch	twelch@ogeecheetech.edu	688-6019
Surgical Technology Instructor	Terri Crosson	tcrosson@ogeecheetech.edu	486-7807
Veterinary Technology Program Director/Instructor	Dr. Amy Dorminey	adorminey@ogeecheetech.edu	688-6037
Welding Instructor	John W. Edwards	jedwards@ogeecheetech.edu	681-3764

OGEECHEE TECHNICAL COLLEGE

Hazard Communication Program Plan Training Log 2018-2019		
Job/Program/Occupational/ Area*	Date	Training Topic
All covered College faculty; all sites	Annual Spring Staff Development Day	Hazardous Materials on the Campus, use and location of SDS, MSDS Online Training
Janitorial Staff: Annual Review for all members of staff	Annual Spring Faculty/Staff Training Day, Facilities Safety Meetings	Hazardous Materials Safety in the workplace
Agribusiness	First Week of each AGRB Course	Safety when working around equipment
Air Conditioning Technology	Spring Semester Course AIRC 1005, week 3	Text- Fundamentals of HVACR Unit 3 - Safety Objective 3.7 - Safety Data Sheet
Automotive Technology	Fall/Spring Semester: First week of the AUTT 1010 class	CH. 7 Environmental and Hazardous Materials
Commercial Truck Driving	Fall, Spring, & Summer Semester CTDL 1010	Hazardous Material Training
Construction	Spring Semester: COFC 1080	HAZCOM-Per the OSHA 29cfr part 1910.1200; Written HAZCON program, Container labeling, and SDS
Cosmetology	Fall and Spring Semester; Covered in COSM 1000 Online class under Infection Control	Hazardous Materials Safety in the Clinical Setting SDS Lab Binders
Criminal Justice Program	Fall and Spring Semester CRJU 1010, CRUJ 1040, CRUJ 1063, CRUJ 2110	Hazardous Materials Safety in Criminal Justice, BBP, Scene Safety, Lab Safety
Culinary Arts	first and fifth week of every CUUL 1110 course	Hazardous Materials Safety in the Kitchen classroom/Lab
Dental Assisting	Fall 2016 Semester: DENA 1050 first week	Chemical and Waste Management
Early Childhood Care & Education	Spring, Summer, Fall Semester: Second week of class for ECCE 11105, Health, Safety, and Nutrition	Hazardous Materials Safety in Clinical Setting and using the program lab
Echocardiography	Fall Semester: ECH1100 & CAVT	Clinical and Lab Safety

Electrical Systems Technology	Fall and Summer Semesters: IDFC1011 Industrial Safety	OSHA Regulations and SHS material
Fish and Wildlife Management	Fall Semester: FWMT 1000 & 1010, FORS 1100; Spring Semester: FWMT2020&2010, FWMT 2030	Hazardous Materials Safety in Fish & Wildlife; Management: Lab Safety. Field Safety, Equipment/Fuel/Oil Safety
Funeral Service	Every Semester FSRV 2030 course in the first and second week	Hazardous Material Safety in the Clinical Setting, Exposure Control Plan. Bloodborne Pathogen Rule, Formaldehyde Standards, PPE, Engineering Controls, and Work Practice Controls
Medical Assisting/Medical Coding	Every Semester during MAST 1080 Medical Assisting Skills I and MAST1090 Medical Assisting Skills II	Hazardous Materials Safety in the Clinical Setting According to curriculum standards
Opticianry	Fall Semester: First week of OPHD 1060	Hazardous Materials in the clinical & Lab Setting
Paramedicine Technology (EMS)	Fall, Spring, Summer Semester: EMSP1110, EMSP 1510, EMSP 2130	EMT, AEMT, EMR, and Paramedic Students Hazardous Materials Safety in Lab and Clinical settings
Pharmacy Technology	Fall & Spring Semester PHAR1010, Spring Semester PHAR1020, PHAR1030 first week	Hazardous Materials Safety in hospital and Retail Pharmacy Settings
Practical Nursing	Fall Semester PNSG 2030	Hazardous Materials Safety in hospital and clinical settings
Nurse Aide Certificate	Fall Semester NAST 1100	Hazardous Materials Safety in the clinical settings
Radiologic Technology	Fall, Spring Summer - RADT 1010; Fall RADT 1200	Radiation Safety and Protection (Intro) Radiation Biology and Protection (Advanced)
Computed Tomography (CT)	Fall, Spring Summer - RADT 1010; Fall RADT 1200	Radiation Safety and Protection (Intro) Radiation Biology and Protection (Advanced)
Health Care Science (Rad Tech)	Fall, Spring Summer - RADT 1010; Fall RADT 1200	Radiation Safety and Protection (Intro) Radiation Biology and Protection (Advanced)
Sonography	Fall Semester: DMSO 1010	Clinical and Lab Safety

Surgical Technology	CSSP 1010 for the HCA, Surgical Tech Track and during SURG 1010/1020	Hazardous Materials Safety in the Clinical setting, Safety techniques for sharps
Veterinary Technology	Summer: VETT 1010, VETT 2160, VETT 2130; Fall VETT 2120, VETT 1060, VETT 1030, VETT 2230; Spring VETT 1020	Hazardous Materials Safety in the Clinical Setting
Welding & Joining Technology	Welding 1000 - Intro to welding, Every Semester as a pre-requisite first week of the course	Hazardous Materials Safety and SDS
