Adopted: January 2009

I. PURPOSE

Certain occupational areas require specific skills or competency mastery that can best be obtained or demonstrated in a laboratory environment with real items or projects. A laboratory environment introduces the "customer dimension" into personal service occupations such as cosmetology and provides real-world working conditions to such industrial and technical occupations as auto mechanics, auto body repair, welding, building construction and others. Instructional Live Work Projects, when carefully managed and controlled, provide a needed dimension to laboratory learning for certain occupations as a planned and integrated component of the curriculum.
